aqa science homework sheet answers

aqa science homework sheet answers

The image displays four GCSE Science Fold & Solve worksheets, each with questions and answers. Red 'AQA' stamps are placed over the questions.

- Energy Changes:** Questions include identifying exothermic/endothermic reactions, drawing energy level diagrams, and calculating activation energy. Answers include: 1. Exothermic, 2. Decrease, 3. Increase, 4. Increase, 5. Decrease.
- Electrolysis:** Questions include labeling an electrolysis diagram, describing the reaction of zinc chloride, and identifying products. Answers include: 1. Zinc ions move towards the negative electrode where they gain electrons to produce zinc. 2. Zinc chloride is an ionic substance. 3. Zinc ions and chloride ions.
- Cell Transport:** Questions include explaining how oxygen moves in and out of cells, and the effect of sugar concentration on water movement. Answers include: 1. Diffusion, 2. Diffusion, 3. Water moves into and out of cells by osmosis.
- Reactions of Acids:** Questions include stating the pH of strong/weak acids and alkalis, and identifying a metal reacting with an acid. Answers include: 1. Strong hydrochloric acid is a strong acid. 2. 25.00 cm³ of vinegar was neutralised by 50.00 cm³ of a solution of sodium hydroxide with a concentration of 0.50 moles per cubic decimetre.
